Professional Summary

Web Based Application Developer with 1+ year of experience in Spring Boot (backend) and Angular (frontend). Skilled in scalable applications, RESTful APIs, and database management, focused on seamless integration and user-friendly solutions.

Experience

Internship at Aadim Innovation, Chabahil

November 2022 – Current

- Developed and maintained web applications using Spring Boot (backend) and Angular (frontend), ensuring seamless integration and performance.
- Built and optimized RESTful APIs while managing databases with JPA/Hibernate, improving data efficiency and scalability.

Projects

Cyber Café

- Created a QR-based online menu system for cafes, enabling customers to scan, browse, order, and pay seamlessly.
- Enhanced customer experience with a contactless dining solution, reducing wait times and improving operational efficiency.

Technologies Used: HTML, CSS, JavaScript, PHP, MySQL

Apply Internship

- Built a platform connecting interns, organizations, and admins, facilitating internship applications and CV generation.
- Enabled organizations to post internships and manage tiers via online payments, with robust admin tools for user and data management.

Technologies Used: Spring Boot (Backend), Angular (Frontend), Postman (for APIs testing), PostgreSQL (Database), Git
