Professional Summary

Web Based Application Developer with 1 year of experience in Spring Boot (backend) and Angular (frontend). Skilled in scalable applications, RESTful APIs, and database management, focused on seamless integration and user-friendly solutions.

Experience

Internship at Aadim Innovation, Chabahil

November 2022, Current

- Developed and maintained web applications using Spring Boot (backend) and Angular (frontend), ensuring seamless integration and performance.
- Built and optimized RESTful APIs while managing databases with JPA/Hibernate, improving data efficiency and scalability.

Projects

Cyber Café

Cyber Cafe Project is a QR-based online menu system designed for cafes, allowing customers to scan a QR code, browse the menu, place orders, and make online payments seamlessly. This system enhances convenience, reduces wait times, and provides a contactless dining experience for customers.

Technologies Used: Html, CSS, JavaScript, PHP, MySQL

Apply Internship

Apply Internship Project is a platform connecting interns, organizations, and administrators. Interns can apply for internships and generate CVs, while organizations can post internships and upgrade tiers via online payments. Admins oversee user management, PAN verification, and master data handling, ensuring a smooth and efficient system.

Technologies Used: Spring Boot (Backend), Angular (Frontend), Postman(for APIs testing), PostgreSQL(Database), Git

Education

Aadim National College, Chabahil [Bachelor in Computer Application]

2021- current

Technical Skills

Spring Boot (Backend), Angular (Frontend), Postman, Html, CSS, JavaScript, PHP, PostgreSQL, MySQL
